Colgate Peroxyl – The secret is in the bubbles

Most adults will, at some time, suffer from minor mouth and gum irritations. Common oral irritations are caused by:

- Mouth ulcers
- Orthodontic appliances
- Cheek bites
- Dentures
- Toothbrushing
- Burns
- Gum inflammation

Colgate Peroxyl is a 1.5% Hydrogen Peroxide mouthwash, with a unique oxygenating action, that offers symptomatic relief of minor mouth and gum irritations.

How Colgate Peroxyl works

1. Contact with enzymes (Peroxidases and Catalases) causes the rapid release of oxygen in a pleasant bubbling action.
2. The oxygenating action flushes away oral debris.
3. Alleviates discomfort caused by gum irritation or inflammation, soreness and mouth ulcers.

Directions for use

Your patients should simply rinse twice daily with 10mL of Colgate Peroxyl for 60 seconds.

Recommend Colgate Peroxyl Mouthwash for the symptomatic relief of minor mouth and gum irritations
