The new AROMA FINE PLUS powder is incorporated rapidly into water through enhanced powder-water affinity, allowing more spatulation time to obtain a smooth bubble-free mix within 20 seconds.

AROMA FINE PLUS

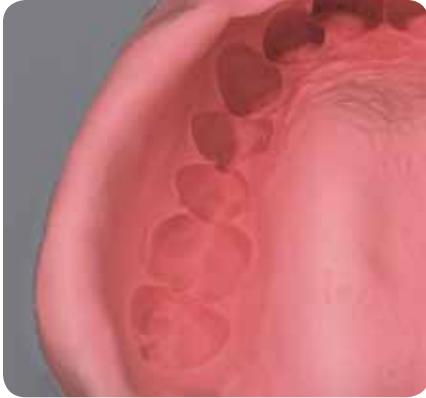

AROMA FINE DF-III

*Indicates the starting and ending time

The reliable properties of AROMA FINE remain unchanged.

Accurate impression

Easy-mixing of AROMA FINE PLUS results in a creamy, bubble-free consistency that captures details accurately.

Optimal thixotropic property

AROMA FINE PLUS provides a balance of good drip resistance and fluidity to effectively provide coverage enabling detailed impression taking with minimal discomfort to patient.

Smooth model surface

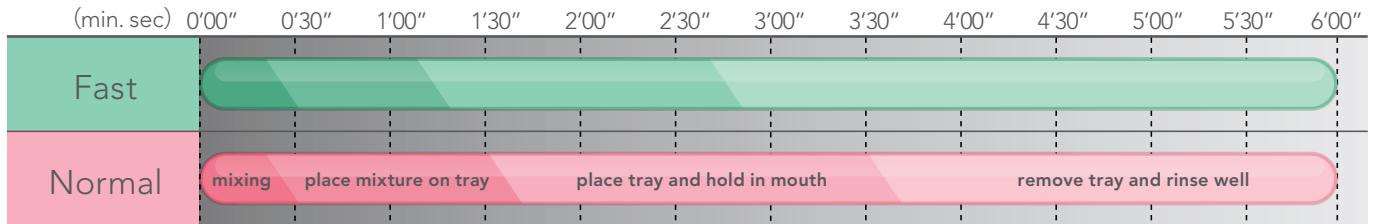

AROMA FINE PLUS has good compatibility with hard stones producing smooth and precise detail reproduction on the gypsum model.

Aroma Fine Plus Physical Properties

Setting types	Setting time from start of mix (room temp 23°C water temp 23°C)	Holding time in mouth	Compressive strength	Strain in compression	Recovery from deformation
Fast	2 min. 30 sec	1 min. 30 sec	0.7MPa	14.6%	97.4%
Normal	3 min.	2 min.			

Working Time

Directions for use

1.

8.4g + 20mL = 20mL

16.8g + 40mL = 40mL

Measurement guidelines

2.

20-30 sec

Spatulate vigorously

3.

Fast
Approx 90 sec

Normal
Approx 120 sec

Hold tray in the mouth. Refreshing spearmint smell for patient comfort

4.

Rinse the impression under running water, and remove excess water

5.

Alginate impression should be poured as soon as possible to avoid distortion.

6.

If cast cannot be poured immediately, wrap the impression in a wet paper towel and store in a tightly sealed plastic bag.
