

Filtek™

Supreme
Flowable Restorative

Now our most popular flowable is easier to inject.

3M™ Filtek™ Supreme XTE Flowable Restorative is available in a new ergonomic syringe. Designed for improved comfort and easier injection, this new product is called 3M™ Filtek™ Supreme Flowable Restorative.

Reduce bubbles and waste

Virtually no bubbles or material “run-on” during dispensing gives you better control.

No more guessing

The blue syringe barrel indicates the remaining material volume. When your syringe is empty, only the white plunger shows.

Bendable cannula

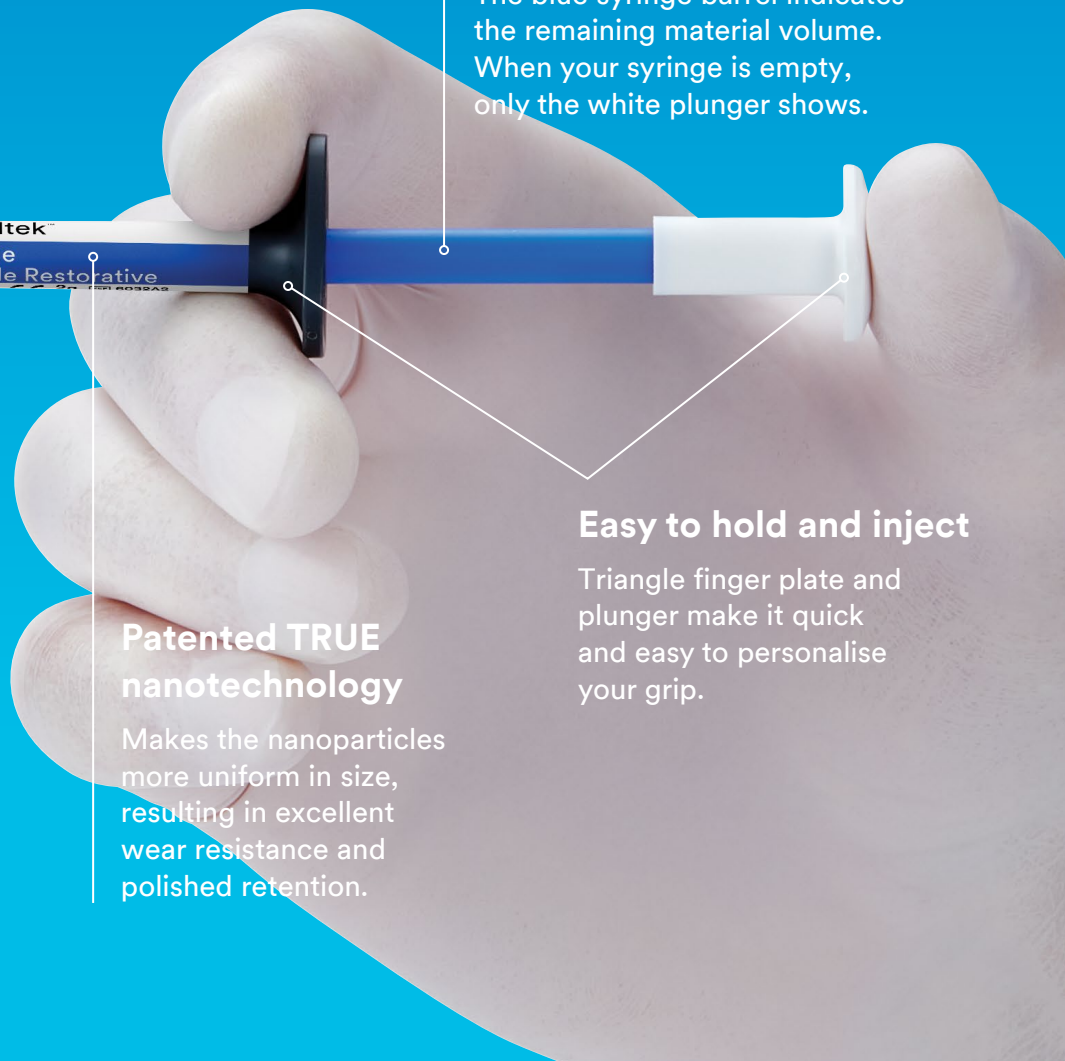

Easy-to-bend without kinking for better access.

Patented TRUE nanotechnology

Makes the nanoparticles more uniform in size, resulting in excellent wear resistance and polished retention.

Easy to hold and inject

Triangle finger plate and plunger make it quick and easy to personalise your grip.

Key benefits

- Virtually no bubbles or material “run-on”
- Easy-to-bend cannula for improved access
- Ergonomic design is easy to hold and inject
- Versatile for a wide range of indications and techniques
- Excellent adaptation and low shrinkage stress
- Can be warmed for injection molding. Warm up to 70C (158F)³ for up to one hour, up to 25 times
