

# Bactol®

## Stopping the transmission of infection is in your hands.

Bactol Alcohol Gel provides antibacterial hand cleansing without the need for water. It has been specially formulated with a natural emollient to replace the skin's lipids which are removed by alcohol. This helps maintain skin integrity and prevents moisture loss leaving your hands hygienic, soft and replenished.

Bactol Alcohol Gel has been developed in compliance with EN1500 testing standard for alcohol based hand rubs. It is formulated with an alcohol concentration of 70% Ethanol v/v, as recommended by WHO for maximum efficacy.<sup>(1)</sup>

<sup>(1)</sup>WHO guidelines on hand hygiene in health care, World Health Organization, 2009.

## Bactol® Moisturiser has been designed to protect the skin. It is enriched with Vitamin E, pH balanced and lanolin free.

- ✓ Softens and Conditions Skin
- ✓ pH Balanced
- ✓ Enriched with Vitamin E
- ✓ Lanolin Free
- ✓ Absorbs quickly
- ✓ Suitable for use under gloves

Bactol® Moisturiser complements Whiteley Corporation's range of hand hygiene products.

It absorbs quickly and is suitable for use under gloves.

Healthcare workers are required to wash or sanitise their hands regularly, and sanitisers and soaps, which don't have emollients, can be very drying on the skin. Dry, cracked skin can create the risk of infection and increase the risk of transmission to others. The use of an oil-containing lotion or a barrier cream, three times a shift, can substantially protect the hands of vulnerable healthcare workers\*.
