

Fit Strip™

Flexible
Interproximal finishers with a
Twist

FitStrips are a complete line of interproximal trimmers and finishers from the company that invented tight interproximal contacts, **Garrison Dental Solutions.**

One handy handle! FitStrips' unique attachable handle has been IMPROVED! It's even easier to attach (or remove) and makes a world of difference for both clinician ease-of-use and patient comfort. Your hand stays outside the mouth, providing a clear field of view and easier operation.

Do the Twist! Twist the colour-coded barrel to adjust FitStrips' curvature and it's automatically locked in place—curved for finishing or straight for IPR. It doesn't get any easier than that!

FitStrip™ – make your procedures easier!

- Orthodontics: The first truly complete IPR/tooth slenderising kit
- Composite restorations: contouring/finishing all interproximal surfaces
- Crown and bridge: cement removal and clean-up

Ready for a marathon! FitStrips are very durable and long lasting. They stay sharp and ready to go even after multiple autoclave cycles.
