Carpal Tunnel Syndrome Prevention: Neurologists recommend alternating instrument handle sizes as one means of reducing stress. Larger diameter handles (#6, #7, #8 and #9) help lighten instrument grasp. Using a combination of various handle sizes plus a more relaxed grasp can help lessen the severity of the symptoms of Carpal Tunnel Syndrome.

Source: Gerwatoski, L.J., McFall, D.B., Stach, D.: Carpal Tunnel Syndrome; Risk Factors and Preventive Strategies for the Dental Hygienist. Journal of Dental Hygiene, February 1992.

HOW TO USE THIS SECTION

- Instrument Name & Pattern — 11/12 Scaler
- Part Code of pictured instrument — | SM11/127
- Available handle designs — Handle options: #2, #4, #6, #7, #8, #9

See index for all available part codes of a specific pattern.

NEW FINELY-HONED FINISH

EverEdge scalers are sharp...EverEdge 2.0 scalers are even sharper. Using an enhanced finishing process, Hu-Friedy's professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

PROPRIETARY PROCESS

Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument. Since EverEdge is not a superficial coating, the instruments can be resharpened like any other scaler.

DIAMOND KNURL

The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

STAYS SHARPER EVEN LONGER

EverEdge 2.0 uses a new, optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in Hu-Friedy's proprietary process, provide the durability needed for effective procedures and continued use.

COMFORT ZONE CONE WITH SIGNATURE SERIES PURPLE GRIPS

Celebrating Dental Hygiene every day with new hygiene-purple grips! The colored grips also allow for easy identification of the EverEdge 2.0 scalers in each set-up.

“ As an educator, I always recommend Hu-Friedy's EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is **less hand fatigue for the hygienist and better comfort for the patient,** so both the clinician and patient can feel the benefits of EverEdge. ”

– JILL NIELD GEHRIG, RDH, MA
Dean Emeritus, Division of Allied Health

“ The EverEdge 2.0 blades **sharpened very easily and remained sharp** with each additional use.” ”

– JUDITH REID, M.Ed, RDH

SICKLE SCALERS

Designed for the removal of supragingival calculus

**H6/H7
Hygienist**
| SH6/79E2

Handle options: #2, #4, #6, #7, #8, #C8, #9
Thin, contra-angle design is for interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces.

**H5/33
Hygienist-
Jacquette**
| SH5/339E2

Handle options: #2, #4, #6, #7, #8, #C8, #9
Thin sickle scaler combined with a straight sickle blade. For scaling interproximal and cervical areas of anterior teeth.

**H5/U15
Hygienist-
Towner**
| SH5/U156

Handle options: #2, #4, #6

**6/7
Goldman**
| SH6/76

Handle options: #2, #4, #6, #7, #8
Shortened blade version of H6/H7.

**U15
Towner**
| SU156

Handle options: #24, #6, #7, #8

**U15/30
Towner-
Jacquette**
| SU15/309E2

Handle options: #2, #4, #6, #7, #8, #C8, #9

**U15/33
Towner-
Jacquette**
| SU15/339E2

Handle options: #2, #4, #6, #7, #8, #C8, #9

Some scalers and curettes are available in an American Dental Classic style that is slightly more rigid in design, with a 5/32" working end. They are offered exclusively in ResinEight® handles. Contact your Hu-Friedy representative for specific part code availability.

NEVI® SCALERS

**Nevi 1
Anterior**

| SCNEVI19E2

Handle options:
#6, #7, #8, #C8, #9

An elongated disk end for anterior lingual stain and calculus removal paired with a super thin, anterior curved sickle.

**Nevi 1/H5
Anterior**

| SNEV1/H59E2

Handle options: #6, #7,
#8, #C8, #9

An elongated disk end for anterior lingual stain and calculus removal paired with a larger H5 sickle – a thin curved blade for interproximal and cervical anterior areas.

**Nevi 2
Posterior**

| SCNEV29E2

Handle options: #6, #7,
#8, #C8, #9

A thin posterior curved sickle scaler, the unique contra-angle design is great for interproximal reach and ergonomic hand positioning.

**Nevi 3
Posterior**

| SCNEVI39E2

Handle options: #C8, #9

Thin, dual cutting blades provide effective placement in tight, narrow contacts and interproximal areas and precise access for effective removal of light to moderate deposits.

**Nevi 4
Posterior**

| SCNEVI49E2

Handle options: #C8, #9

Tapered dual cutting blades provide precise access for effective deposit removal and increased shank rigidity provides for effective removal of burnished, heavy and tenacious deposits.

SICKLE SCALERS

JACQUETTE SCALERS

THE CURVED SICKLE SCALER
Two cutting edges on a curved blade that end in a sharp point

THE STRAIGHT SICKLE SCALER

SCALER/CURETTE SETS

GOLDMAN-FOX SET

**GF-1
Universal Scaler**
| SGF16
Handle options: #4, #6

For removing heavy supragingival and subgingival calculus; Useful on proximal surfaces and interproximal areas during periodontal surgical procedures.

**GF-5 Hoe
Buccal/Lingual**
| SGF5
Handle: #4

For removing heavy calculus deposits

**GF-2
Curette**
| SGF26
Handle options: #4, #6

Contour design for removal of calculus on anterior teeth and premolars

**GF-6
Hoe**
| SGF6
Handle: #4

For mesial/distal surfaces of the posterior teeth or facial/lingual surfaces of the anterior teeth

**GF-3
Curette**
| SGF36
Handle options: #4, #6

Same blade surface as GF-2, but specifically designed for the proximal surface of the posterior teeth.

GF-21
| SGF21
Handle Options: #4, #6

Sharp spoon on one end is for debridement in curettage procedures. Small scaler on the other end can be used with either a circumferential or vertical stroke.

**GF-4
Curette**
| SGF46
Handle options: #4, #6

Additional bend in the shank for easier calculus removal in the molar region

**GF-21S/33
Combination**
| SGF21S/33
Handle Options: #2, #4

Small end Goldman-Fox scaler with a #33 straight miniature Jacquette scaler

CATTONI SET

and mandibular posterior

LANGER APPLICATION CHART

**Standard
Langer
Curette**

**After Five®
Langer
Curette**

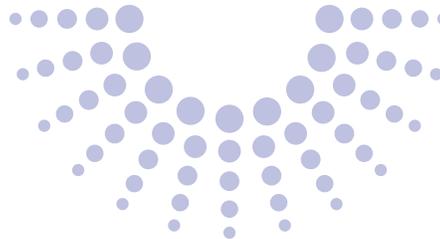

**Mini Five®
Langer
Curette**

- Langer After Five and Mini Five Curette terminal shanks are elongated by 3 mm for access into deep periodontal pockets and root surfaces of 5 mm or more.
- Blade is 10% thinner than standard Langer to ease gingival insertion and reduce tissue distention.
- Langer Mini Five Curette has a reduced blade, half the length of the After Five Langer Curette or standard Langer, for better adaptation in narrow pockets and furcations.

Langer curettes have the shank design of a Gracey curette combined with a universal blade. These instruments can scale all surfaces.

GRACEY CURETTES

Designed to adapt to a specific area or tooth surface.

STANDARD GRACEY CURETTES

- Area-specific allows for deep scaling, root planing and periodontal debridement.
- Offset blade provides a perfect working angulation for the tooth surface.
- Offset blade angulation means only the lower cutting edge of each blade is used.

1/2
(shown)

| **SG1/29E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

1/2
Rigid

| **SG1/2R9E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

Slight contra-angle for anterior
incisors and canines

3/4
(shown)

| **SG3/49E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

3/4
Rigid

| **SG3/4R9E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

Short contra-angle for anterior
incisors and canines

5/6
(shown)

Angulated to reach mesial surfaces of posterior teeth

13/14⁺
(shown)

| **SG13/149E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

13/14
Rigid

| **SG13/14R9E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

13/14
Extra Rigid

| **SG13/14ER8**

Handle options:
#4, #6, #7, #8

Angulated to reach distal surfaces of posterior teeth

15/16⁺
(shown)

| **SG15/169E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

15/16
Rigid

| **SG15/16R9E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

Same shank bends as 13/14, but blade positioned to reach mesial posterior surfaces

17/18

| **SG17/189E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

17/18
Rigid

| **SG17/18R9E2**

Handle options: #2, #4,
#6, #7, #8, #C8, #9

Accentuated angles improve access to distal posterior surfaces. The 17/18 also has smaller blade and slightly longer terminal shank.

The Rigid Gracey has a thicker, stronger, and less flexible shank than the standard Gracey. This allows for removal of moderate to heavy calculus.

*Area-specific curettes also available in Kramer-Ne vins and Turgeon designs.

LITE CURETTES

Periodontal Maintenance Curettes by Anna Pattison

PERIODONTAL MAINTENANCE CURETTES BY ANNA PATTISON

- Shorter, thinner, smaller blades
- Honed at a 60° angle
- Modified rigid shank specially designed to allow easier access and easier insertion under tight tissue

HU-FRIEDY THINNING SERVICE

Most scalers and cures (except After Five® and Mini Five®) can be thinned to create an extra fine blade. Add TSDE to double-end or TSSE to single-end to the original part code.

GRACEY CURETTES

AFTER FIVE® GRACEY CURETTES

Designed to adapt to a specific area or tooth surface.

- Terminal shank is 3 mm longer than Standard Gracey.
- Longer terminal shank allows better access to deep pockets and areas with recession.
- Blade is 10% thinner than standard Gracey curette to allow for less tissue distention when accessing deeper pockets.

Terminal shank redesigned to be 3 mm longer than a standard Gracey curette.

Gracey After Five curette reaching deep into a pocket.

MINI FIVE® GRACEY CURETTES

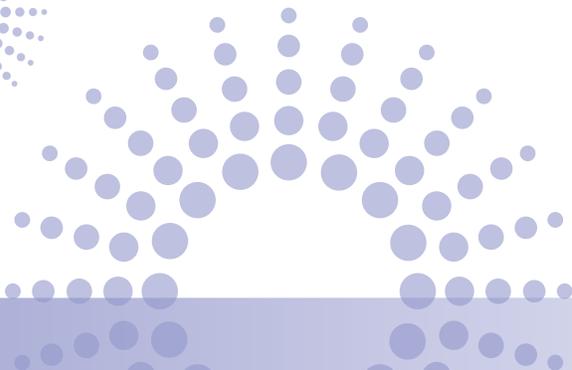

- Terminal shank is 3 mm longer than Standard Gracey.
- Compared to the standard Gracey curette, blade is 50% shorter and 10% thinner.
- Good for scaling in deep, narrow pockets.

Mini Five reaching into a deep pocket on a narrow root.

THE CLAYTON GRACEY STORY

In the late 1940s, an innovative dentist from the University of Michigan had a vision. Clayton Gracey wanted to **“give every dentist the possibility to treat even the deepest and least accessible periodontal pockets simply and without traumatic stretching of the gingiva.”**

Dr. Gracey brought his idea to Hugo Friedman, the founder of Hu-Friedy, who supported his concept. Together they developed a series of 14 single-ended area-specific instruments for the successful removal of deposits from root surfaces.

Dr. Gracey’s designs laid the groundwork for the new instruments of today. Currently, Gracey curettes are available as double-ended instruments with multiple handle choices.

The Gracey curettes have come a long way since the original design. Hu-Friedy currently manufactures a variety of styles and patterns, such as After Five® curettes with a longer terminal shank and thinned blade, Mini Five® curettes with After Five® features and a shorter blade, and the 15/16 and 17/18 patterns. An optional Rigid shank is available on all of the Gracey designs.

Hu-Friedy is continually looking for new ways to improve our existing products. Our success is dedicated to the pioneers in dentistry, including Dr. Clayton Gracey, who helped to make a vision become not only a reality, but also a part of every dental office today.

RESIN 8 COLORS

For EverEdge & EverEdge 2.0

Hu-Friedy's Resin 8 Colors are ergonomic, lightweight and offer a color-coding system based on specific areas of the mouth. Plus, each scaler and curette features Hu-Friedy's proprietary EverEdge® technology, which keeps the working ends sharper longer. See the full list of Resin 8 Colors part codes on page D27.

AFTER 25 STROKES

TITANIUM IMPLANT SCALERS

Perform at your best with Hu-Friedy's new, state of the art line of Titanium Implant Scalers. Made from the same titanium alloy as implants and abutments, these scalers are expertly designed and manufactured for implant maintenance, debridement, biofilm removal and can be used both supra and subgingival.

TITANIUM IMPLANT SCALERS

- Significantly increased visibility with Hu-Friedy's signature teal colored anodized titanium
- Optimized sharpness with finely honed cutting edges and sharpened post anodization process
- Ability to be sharpened at any time to increase the useful life of the instrument
- Enhanced ergonomic handle for maximum tactile sensitivity and support

KRAMER-NEVINS CURETTES

- The Kramer-Nevins modified Gracey curette series is designed for root planing and subgingival curettage.
- Features slightly modified blade curvatures, thinner profiles, and extra length to help gain access to difficult areas without losing curette "bite."
- Most commonly employed during initial pre-surgical preparation and with all maintenance patients.
- Also extremely useful during surgery.

DISPOSABLE PROPHY ANGLES

Hu-Friedy Disposable Propfy Angles feature ergonomic and design enhancements to improve clinical outcomes, reduce clinician stress and maximize patient acceptance. Available in standard straight and a 15° contra design with a choice of soft or firm cups, Hu-Friedy Disposable Propfy Angles enable you to perform at your best with the quality, reliability and performance you've come to expect from Hu-Friedy.

POINTS OF PERFORMANCE

- Inner spiral cup design with smooth exterior for superior paste delivery, greater interproximal reach and less splatter
- Precision-manufactured internal-drive components deliver reliable, smooth performance
- Proprietary grip for a light, secure grasp, greater rotational control and reduced hand fatigue
- Soft and firm cups meet clinician- and patient-specific requirements
- 15° contra angle style allows for a more comfortable, neutral wrist position
- Compatible with most common low-speed handpieces
- Not made with natural rubber latex

INSTRUMENT SHARPENING

SIDEKICK SHARPENER

The Hu-Friedy Sidekick sharpener is designed for routine maintenance sharpening of scalers and curettes. Correct routine sharpening helps extend instrument life.

- The Sidekick sharpener is cordless for use anywhere in the dental office.
- Instrument Guide Channels and Vertical Backstops are “template-like” guides that help control blade angulation, providing consistent results.
- The Sidekick sharpener is compact and requires minimal space.

Sidekick Sharpening Kit

Magnifying Lens	LENS

DIAMOND SHARPENING CARDS

- A uniform coating of industrial diamonds bonded to high quality stainless steel provides an extremely hard, flat surface for instrument sharpening.
- Durable surface resists grooving and ditching; remains flat after repeated use and will not break or shatter if dropped.
- Easy clean-up via ultrasonic cleaner and steam sterilization.
- Thin credit-card size shape allows sharpening cards to readily fit into sterilization pouches or cassettes with procedural set-ups.

MISCELLANEOUS

SIGNATURE SERIES GRIPS

Signature Series grips can only be used with Satin Steel Colours®, EverEdge® technology and ResinEight® instruments and are used for identifying and organizing instruments. They're useful for maintaining proper instrument order in cassettes and identifying instruments by procedure. Grips will withstand all approved heat sterilization methods.

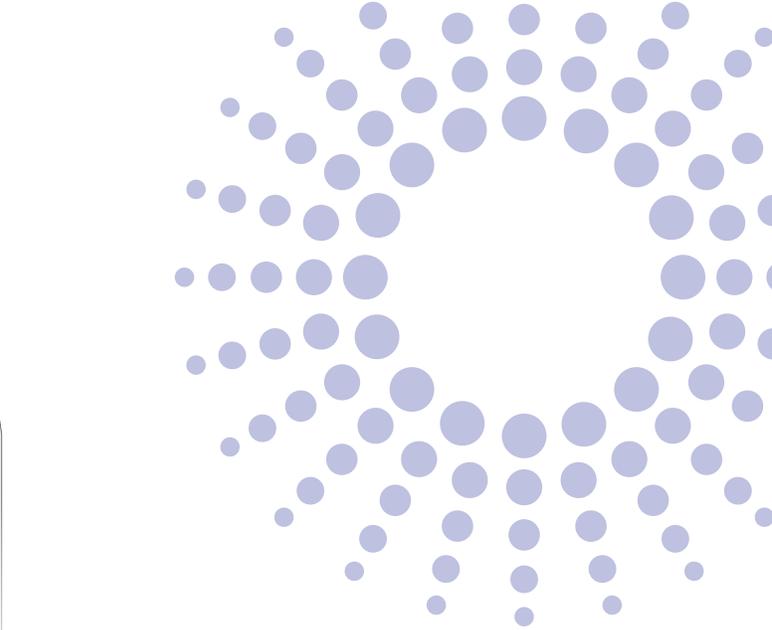

All single color packages contain 16 pieces. The assorted color packages contain your choice of either 16 or 80 pieces.

Brush Handle 1

| HCB1

Used for pit and fissure sealant, acid etch, and placement procedures. Made of Immunity Steel® material to allow sterilization by autoclave. Design holds most manufacturers' brush inserts.

Immunity Steel Pumice Cup, Modified

| PCUPM

Used to hold prophylaxis paste or medicaments. Made of corrosion resistant, acid-proof stainless steel.
