

KIMBERLY-CLARK® PROTECTAPAD

Multi-purpose medical laminate

Kimberly-Clark PROTECTAPAD is made of 4 layers of paper tissue and 1 layer of soft polyethylene laminated together to provide a waterproof absorbent surface protection.

Used extensively in dental surgeries, Kimberly-Clark PROTECTAPAD is the ideal dental bib. It is used to provide a hygienic surface for dental tools and also for covering benches and trays in pathology labs.

Kimberly-Clark PROTECTAPAD is also used as a medical procedures underlay where fluids are involved, eg. Pillow protection.

No strike through of fluids

- Poly backing prevents leakage

Highly absorbent and soft

- Soaks up fluids, surface protection

Soft and comfortable for patients

- Multiple layers of fine tissue

Economical

- Reduce laundering costs
- Reduce staff time involved in changing linen
