

Go Green With Envy

Gentle on the skin
Gentle on your trays
Gentle on the environment

pH  neutral

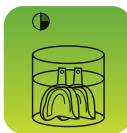

Whip Mix Green Envy™ tray cleaner is a natural way of removing alginate residues from impression trays.

- Dissolves residue as it interacts, instead of reacts, with soils and surfaces.
- pH Neutral mixture is gentle on skin and biodegradable.
- Does not corrode metal trays.
- The 1 lb. jar provides cleaning for more than 200 trays.

Simply mix Green Envy™ with water according to the directions, immerse the instruments for 15-30 minutes, then brush or rinse with warm water. The only thing left behind is a fresh, light citrus scent.

Mix 2 cap fulls of Green Envy tray cleaner in 2 cups (16 oz.) of lukewarm water.

Immerse instruments for 15-30 minutes.

Rinse or brush off with warm water, and you're done.

Green Envy™ TRAY CLEANER
